Katie Langlin, PhD
Ecology
Associate Editor, Career News
Science Magazine
Katie’s doctoral research focused on the ecology and evolution of birds. Her first taste of journalism was at National Geographic, where she joined the newsroom for a summer as an AAAS Mass Media Fellow—an experience that widened her view of possible career options in front of her. She served as a news intern at Science before being hired on as a staff reporter and editor.

Stu Field, PhD; Post-Doc @ CSU – Mathematics & Biology
Bioinformatics Scientist II, SomaLogic, Inc.
Stu’s post-doctoral research focused on the quantitative analysis of infectious disease models. During his post-doc, he was also Adjunct Faculty in the Biology department. His doctoral research centered on the effects of parasitism on the population biology of the earthworm. He currently is the head R code developer in the bioinformatics group, producing R libraries that support clinical insight via machine learning and classical statistical techniques.

Jessie Filer, PhD
Cell & Molecular Biology
Medical Writer, PhiMed Communications, LLC
Jessie’s doctoral research focused on viral diagnostics and biosensors. Early in her graduate career, she realized that she enjoyed communicating science more than conducting the research. As a GAUSSI fellow for interdisciplinary collaboration and communication, Jessie maximized opportunities to practice science. As a medical writer, she develops technical and non-technical content for medical communications and marketing.

Mack Fogelson, MA
English/Communication Develp.
Partner, The Ready
Mack is an accomplished writer, speaker, and former entrepreneur. She has been honored to move thought forward with publications such as The Economist. Mack currently coaches and guides executives, their teams, and Fortune 500 organizations to lasting behavioral, systems, and cultural change.

Melyssa Mead, BA
English, Women’s Studies Minor
Brand Director, Suerte Tequila
For 10 years, Melyssa led the in-house team of creatives at New Belgium Brewing. Seeing opportunity in craft spirits, Melyssa made the move to Suerte where she is converting tequila skeptics into lifelong fans. Prior to her days peddling booze, Melyssa spent a decade in advertising as a copywriter and creative director for a wide range of clients, including American Lung Association, Horizon Organic, Alaska Tourism and IBM.

Angela Morrison, JD, MS, Cellular & Molecular Biology
JD @ CU Law School
Partner, Dorsey & Whitney LLP (Patent Attorney)
Angie’s MS research focused on the role of a unique polyadenylation element and novel RNA-binding proteins. Immediate post MS, Angie enrolled in Law School at the University of Colorado. During that time she clerked at Swanson and Bratschun, LLC, and Sheridan Ross, P.D., prior to joining Dorsey & Whitney, LLP. She regularly assists clients in the biotechnology, pharmaceutical, chemical, and agricultural industries.
