Graduate Student Council
- by graduate students for graduate students

Advocating for your graduate experience
Our Vision

Graduate students are embarking on an educational journey to prepare them for a long and successful career. We envision a diverse, enriching research and academic environment with mentors who foremost support the needs and future direction of students, and an administration which prioritizes the physical, mental, and social well-being of the graduate student body.
Our Mission

The mission of the Graduate Student Council is to foster a sense of worth and comradery among graduate students; to encourage and recognize that a diverse and inclusive student body strengthens our community; to listen to the needs and concerns of the graduate student body through representatives and amplify their voices to the Graduate School. Additionally, the GSC provides professional development and social opportunities, procures funds for graduate student organizations, and provides quarterly awards for supply and travel.

The GSC has developed long-standing and effective relationships with administrators to advance the interests and protect the rights of the graduate student body. The GSC is proud of it’s history of advocacy, and will continue to act as a strong and unified proponent for graduate students at CSU.
What the GSC does for graduate students

• Directly **advocates** for graduate students' needs at the administration level for policies, procedures, and programs that benefit graduate and professional students.

• **Supports** graduate students through professional development and travel awards to fund graduate work and attend professional conferences.

• GSC is committed to the **inclusion** of all students from all departments and all identities, skills, ideas, talents and contributions.
